## Professional Summary

Maker. Agentic systems builder, speaker, educator, and author. Design Engineer from Chile. I build pipelines and tooling that optimizes design & code workflows. Developing the skills, infrastructure, and methodology to make that real. No translation gaps, no interpretation errors. Just seamless execution between design and code.

## Key Skills

Complex Systems Design	Agentic Systems	Design Systems	Code-Based Prototyping
AI-Assisted Workflows	AI-Assisted development	Research-Driven Design	

## Languages

Spanish - Native	English - B2
------------------	--------------

## Work Experience

### Enara Health - Design Engineer

Sep 2023 to present

- Architected Enara's agentic design system; Token pipeline, contract schemas, and an agent-infrastructure layer (scaffolding, token audits, metadata, codebase indexing, PR review) that auto-enforces DesignOps + DevOps rules through the whole pipeline. The system sustains 100% component metadata and barrel-export parity, zero hardcoded colors across 42 components, and 1:1 auto-generated documentation. A self-auditing system that ensures governance at scale.
- Led the member app redesign grounded in a clinical study on key success factors in telehealth weight care. Consolidated core actions, resulting in +29% appointment clicks, +13% progress views, and +25% more members using logging tools.
- Redesigned Enara's website, contributing to 16.5% growth in active members and 230% more partner submissions.
- Directed Enara's brand refresh, aligning clinic assets, sales decks, and digital platforms under a unified identity and standardized design patterns.

### Honda - Web Designer - UX Consultant

Dec 2022 to Feb 2024

- Led user research for Honda Services redesign (463 owners, 74.6% completion rate). AI-assisted analysis crossing demographic, behavioral and attitudinal data. Discovered 61% of loyal customers didn't know the platform existed, surfaced behavioral insights that enabled a go-to-market strategy shift.
- Designed landing pages that drove a 30% lift in leads for Honda's latest cars and motorcycles.

## Talks

"Encoding governance on agentic design systems" – [Into Design Systems AI Conference 2026](#)

Mar 19, 2026

"Building an agentic design system" – [Nerdearla Chile 2026](#)

Apr 18, 2026

## Shipped

### Articles

- ["Towards an agentic design system"](#), Medium series featuring articles published in Design Systems Collective.

### Open source tools

- Built a [Claude skills](#) that superpowers design to code workflows and enables the functional layers for agentic design systems with 1K+ installs via NPM.
- Published 2 [Figma plugins](#): DS Adoption Tracker and Code Syntax Generator. Essential for design system adoption tracking and Figma to code pipelines.
